English

SUMMARY

Aspiring front-end developer with a solid foundation in HTML, CSS, JavaScript, React, and Tailwind CSS. Looking for an internship to apply my skills in real-world projects and grow as a developer. A fast learner with strong problem-solving abilities and a passion for web development.

PROJECTS

MINISHELL

- Minishell is a project that involves building a simple Unix shell in C, implementing features like command parsing, piping, redirection, environment variable handling, and basic built-in commands

WEBSERV

- WebServ is a project that involves building a custom HTTP server in C++98, implementing features like request handling, configuration parsing, I/O multiplexing.

INCEPTION

- Inception is a project that involves setting up a development environment using Docker, where students create containerized applications and automate their configuration to ensure consistent development environments across teams.

FT_TRANSCENDENCE

- ft_transcendence is a project that involves building a gaming platform with user authentication, enabling players to connect with friends and access features such as sending friend requests, editing profiles, and viewing game history. The project is typically developed using a full-stack approach, integrating both back-end and front-end technologies.
- I am contributing as a front-end developer, utilizing HTML, CSS, and vanilla JavaScript to craft the user interface, ensuring an interactive and responsive experience across all devices.
